## SUMMARY

A Full-Stack Developer with exceptional skills, committed to contributing to the success of the company. Thrive in teamwork and have a great passion for collaborating with others. My problem-solving abilities have been honed through my studies at NSCC and my career as an aircraft mechanic.

## SKILLS

JavaScript/TypeScript, HTML/CSS, PHP, C#, Laravel, React, Node.js, Express, .NET, Jest, SQL, Git

## WORK EXPERIENCE

### Nova Scotia Community College

Halifax, NS

Web Developer

April 2022 - May 2022

- Developed new features for the NSCC IT Job Fair website for about 600 IT students and 50 IT companies using **PHP**, **Laravel**, **JavaScript**, and **MySQL**.
- Implemented a login and registration system with a newly redesigned database to enable persistent account profiles, improving website usability and user experience.
- Restructured existing code with 4 team members in a scrum format to improve code quality and maintainability in a span of 5 weeks.

## PROJECTS

### Catsgram (<https://catsgram.herokuapp.com>)

- Developed a web application with REST API that utilizes **PHP**, **HTML/CSS**, **TypeScript**, **React**, **Laravel**, **Jest**, and **MySQL**, where users can exclusively share photos of felines.

### How old do I look? (<https://how-old-do-i-look.herokuapp.com>)

- Developed a web application with REST API using **React**, **Node.js**, **HTML/CSS**, **JavaScript**, and **PostgreSQL** where users can upload images to the website and determine if they look older or younger than their age in pictures using machine learning.
- Designed and implemented a login, registration, and the main homepage, allowing users to create an account.

### Flight Tracker ([https://github.com/DevTaehong/Flight\\_Tracker](https://github.com/DevTaehong/Flight_Tracker))

- Developed a desktop app that displays airplane locations using **C#**, **.NET**, and **SQLite**.
- Implemented search and filter functionalities for flight information based on country.

### Real-Time Flight Tracker (<https://real-time-flight-tracker.netlify.app>)

- Developed a front-end project that displays Canadian airplanes and their corresponding data on a map using **JavaScript** and Leaflet.

## EDUCATION

### Nova Scotia Community College

Halifax, NS

Diploma in IT Programming (GPA: 3.63/4.0)

Graduation Date: June 2022

### Korean Aviation College

Seoul, South Korea

BS in Engineering, Aircraft Maintenance & Operation (GPA: 4.35/4.5) Graduation Date: February 2016
